QUESTION NUMBER TWO

Read the following text carefully, and then in your ANSWER BOOKLET answer all the questions that follow. Your answers should be based on the text.

In just a few years' time, experts say that billions of machines will be connected to each other and to the Internet. As a consequence, computers will increasingly run our lives for us. For example, your fridge will know when you need more milk and add it to your online shopping list; your windows will close if it is likely to rain; your watch will record your heart rate and email your doctor; and your sofa will tell you when you need to stand up and get some exercise!

Many people are excited about the 'Internet of Things'. For them, a dream is coming true. They say that our lives will be easier and more comfortable. However, others are not so sure. They want to keep control of their own lives and their own things. In addition, they wonder what would happen if criminals managed to access their passwords and security settings. The dream could easily become a nightmare!

1. According to the text, how will the 'Internet of Things' help you to keep fit?

The sofa will tell you when to get some exercise.

2. What does the underlined word "others" refer to?

others: other people with a different opinion

3. According to the text, why are some people excited about the future?

Some people are excited because they think their lives will be made easier and more comfortable.

4. The writer mentions two disadvantages of the 'Internet of Things'. Write down these two disadvantages.

They want to keep control of their own lives and their own things. In addition, they wonder what would happen if criminals managed to access their passwords and security settings.

OR ANY RELEVANT ANSWER.

QUESTION NUMBER THREE

Read the following text carefully, and then in your ANSWER BOOKLET answer all the questions that follow. Your answers should be based on the text.

When you are using a computer, think about the technology that is needed for it to work. People have been using types of computers for thousands of years. A metal machine was found on the seabed in Greece that was more than 2,000 years old. It is believed that this was the first ever computer.

In the 1940s, technology had developed enough for inventors to make the first generation of modern computers. The first model was so large that it needed a room that was 167 square metres to accommodate it. During that decade, scientists in England developed the first computer program. It took 25 minutes to complete one calculation. In 1958 CE, the computer chip was developed.

The first computer game was produced in 1962 CE, followed two years later by the computer mouse. In 1971 CE, the floppy disk was invented, which meant that information could be shared between computers.

Students often use computers at home if they have them. Students can use social media on their computers to help them with their studies, including asking other students to check and compare their work, asking questions and sharing ideas.

1. According to the text, using social media can help students with their studies in many different ways. Write down two of these ways.

Any two of the following:

- Asking other students to check and compare their work.
- asking questions.
- sharing ideas.

2. The years from 1960 to 1969 witnessed the development of two important inventions in the field of computers. Write down these two inventions.

- The first computer game.
- The computer mouse.

3. Write down the sentence which refers to the advantage of using floppy disks.

In 1971 CE, the floppy disk was invented, which meant that information could be shared between computers.

4. What does the underlined word "it", in paragraph two, refer to?

The first model (of computers)

5. Find a word in the text which means the same as "to have trust or confidence in something or someone".

5. rely on

6. The writer states that computer technology will develop further in the future. Suggest three developments that might take place in the future, other than those mentioned in the text.

6. Open answer
